

## AP Young Environmentalist

Two of our Aqua Parks are located in a beautiful nature reserves, Rutland and Suffolk. For these two sites we can also use Anglian Water's web pages to assist with research.

### AP Rookie

Environmental Research: Use the Anglian Water websites:

<https://anglianwaterparks.co.uk/rutland-water-park/nature-wildlife>

<https://anglianwaterparks.co.uk/alton-water-park/nature-and-wildlife>

and Google searches to identify the answers to the following questions:

- Is it a natural lake or a manmade reservoir?
- What species of bird, animals or fish are present in the surrounding environment?
- What is Rutland Water's most famous bird conservation project?
- Is the area zoned to allow different activities to take place on or around the water?
- What can the Aqua Park staff and visitors do to manage their effect on the environment?

### AP Hero

Before your visit use the Anglian Water website to understand how people can use the nature reserve alongside each other and safely.

<https://anglianwaterparks.co.uk/rutland-water-park/visitor-information>

<https://anglianwaterparks.co.uk/alton-water-park/visitor-information>

- Research water bathing quality standards. What should you look for when you get into the water?

# AQUAPARK

GROUP

## Aqua Park Cardiff

If you are bringing a group of pupils down to the barrage you can find an Education pack available at: <https://cardiffharbour.com/education/>

This supports both key stage 2 and 3.

### **AP Rookie – Cardiff**

The environment that we operate in on the barrage is man-made. Before your visit to the Aqua Park look at the resources on this website:

<https://cardiffharbour.com/>

This can be used to find out about the history of the project and regeneration in the area.

### **AP Hero - Cardiff**

Learn about environmental monitoring on the Bay through the Harbour Authority website:

<https://cardiffharbour.com/>
